CRITICAL INFRASTRUCTURE TECHNOLOGIES LTD. EXECUTES CONFIDENTIALITY AGREEMENTS TO ADVANCE NEXUS 20 COMMUNICATIONS SYSTEMS

Vancouver, BC – September 15, 2025 – Critical Infrastructure Technologies Ltd. (CSE: CTTT) (FRA: X9V) ("CiTech" or the "Company"), a leading developer of autonomous, high-capacity mobile communications platforms, is pleased to announce the execution of two three-way Confidentiality Agreements (NDAs) with leading global partners to advance secure communications capabilities for the Nexus 20 platform, requested by the Ukrainian Ministry of Defence.

The agreements were signed between:

- Babcock Land Defence Limited, **Nokia Solutions and Networks Oy**, and Critical Infrastructure Technologies
- Babcock Land Defence Limited, Ericsson Limited, and Critical Infrastructure Technologies

These NDAs provide the framework for collaboration on the design and integration of full-scope 4G/5G telecommunications systems into the Nexus 20. Both Nokia and Ericsson have been selected as preferred suppliers of advanced telecommunications hardware for the program, which includes delivery of 50 Nexus 20 platforms.

"This milestone ensures that industry leaders can work together in a secure and collaborative environment to deliver world-class communications systems to meet the Ukrainian Ministry of Defence's operational requirements," said Brenton Scott, CEO of CiTech. "By leveraging the proven capabilities of Nokia and Ericsson, alongside Babcock's extensive defence expertise, we are advancing toward fully integrated, next-generation communications for the Nexus 20 platform."

The Nexus 20 program underscores the importance of resilient, secure, and high-capacity communications in modern defence operations. The execution of these NDAs paves the way for detailed system design and integration, bringing the project one step closer to deployment.

On Behalf of the Board of Directors:

Brenton Scott
Director & Chief Executive Officer
Critical Infrastructure Technologies Ltd.

About Critical Infrastructure Technologies Ltd.

Listed on the CSE with operations in Perth, Western Australia, CiTech is creating autonomous, high capacity, rapidly deployable technology that delivers essential services to where they are needed most. CiTech is targeting the mining, defence, border security/surveillance and emergency services sectors in relation to its first product release, the Nexus 16, which aims to provide critical mobile telecommunications for such sectors. Using patented technologies, CiTech's self-deploying platform (SDP) provides a solution for two of the greatest limitations of current rapidly deployable communication solutions, strength of the tower and ability to rapidly self-deploy and operate, in numerous situations. The SDP is designed to support radio equipment including LTE (Long Term Evolution) and several other technological payloads, such as surveillance and anti-drone systems. CiTech has completed the research and development phase and is currently commercialising the first of many products that will be released. To learn more about the Company, visit www.citech.com.au.

Neither the CSE nor its Regulation Services Provider (as that term is defined in the policies of the CSE) accepts responsibility for the adequacy or accuracy of this release.

FORWARD-LOOKING INFORMATION

This news release contains "forward-looking information" and "forward-looking statements" (collectively, "forward-looking information") within the meaning of applicable securities laws. Forward-looking information is generally identifiable by use of the words "believes," "may," "plans," "will," "anticipates," "intends," "could", "estimates", "expects", "forecasts", "projects" and similar expressions, and the negative of such expressions. Forward-looking information in this news release.

Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Forward-looking information is based on the reasonable assumptions, estimates, analysis and opinions of management made in light of its experience and perception of trends, current conditions and expected developments, and other factors that management believes are relevant and reasonable in the circumstances at the date such statements are made. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. All forward-looking information herein is qualified in its entirety by this cautionary statement, and the Company disclaims any obligation to revise or update any such forward-looking information or to publicly announce the result of any revisions to any of the forward-looking information contained herein to reflect future results, events or developments, except as required by law.
