CRITICAL INFRASTRUCTURE TECHNOLOGIES LTD. ESTABLISHES WHOLLY OWNED LATVIAN SUBSIDIARY: “SIA CiTech Europe”

Vancouver, BC – October 1, 2025 – Critical Infrastructure Technologies Ltd. (CSE: CTTT) (OTC: CITLF) (FRA: X9V) (“CiTech” or the “Company”), a leading developer of autonomous, high-capacity mobile communications platforms, is pleased to announce the formation of its new Latvian entity, SIA CiTech Europe, marking a significant step in the company’s global growth strategy.

CiTech has outlined plans for Latvia to become its European Headquarters in 2026, with the establishment of a manufacturing facility and dedicated sales force to serve markets across Europe.

Advanced discussions have taken place to locate the new facility in the Special Economic Zone (SEZ) in the port city of Liepaja, on Latvia’s western coast, positioning CiTech to leverage the region’s logistical advantages and strategic location within the European Union. SEZ currently has a corporate tax rate of 4%.

Strategic Engagements in Latvia

As part of its due diligence, CiTech has conducted a series of high-level meetings with key stakeholders, including:

1. Ministry of Defence
2. Ministry of Foreign Affairs
3. Latvian Investment and Development Agency (LIAA)
4. Armed Forces Command
5. Liepaja Local Government
6. Liepaja Special Economic Zone Agency

“These engagements have confirmed Latvia’s attractiveness as the home for our European headquarters,” said Brenton Scott, CEO of CiTech. “We are very excited to be accelerating our establishment in Latvia, building strong partnerships and creating a hub to support defence, border security and surveillance, infrastructure, and innovation across the European market.”

The establishment of SIA CiTech Europe strengthens CiTech’s international footprint and represents a long-term commitment to Europe.

On Behalf of the Board of Directors:

About Critical Infrastructure Technologies Ltd.

Listed on the CSE with operations in Perth, Western Australia, CiTech is creating autonomous, high capacity, rapidly deployable technology that delivers essential services to where they are needed most. CiTech is targeting the mining, defence, border security/surveillance and emergency services sectors in relation to its first product release, the Nexus 16, which aims to provide critical mobile telecommunications for such sectors. Using patented technologies, CiTech's self-deploying platform (SDP) provides a solution for two of the greatest limitations of current rapidly deployable communication solutions, strength of the tower and ability to rapidly self-deploy and operate, in numerous situations. The SDP is designed to support radio equipment including LTE (Long Term Evolution) and several other technological payloads, such as surveillance and anti-drone systems. CiTech has completed the research and development phase and is currently commercialising the first of many products that will be released. To learn more about the Company, visit www.citech.com.au.

Neither the CSE nor its Regulation Services Provider (as that term is defined in the policies of the CSE) accepts responsibility for the adequacy or accuracy of this release.

FORWARD-LOOKING INFORMATION

*This news release contains "forward-looking information" and "forward-looking statements" (collectively, "**forward-looking information**") within the meaning of applicable securities laws. Forward-looking information is generally identifiable by use of the words "believes," "may," "plans," "will," "anticipates," "intends," "could", "estimates", "expects", "forecasts", "projects" and similar expressions, and the negative of such expressions. Forward-looking information in this news release.*

Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Forward-looking information is based on the reasonable assumptions, estimates, analysis and opinions of management made in light of its experience and perception of trends, current conditions and expected developments, and other factors that management believes are relevant and reasonable in the circumstances at the date such statements are made. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking

information, there may be other factors that cause results not to be as anticipated. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. All forward-looking information herein is qualified in its entirety by this cautionary statement, and the Company disclaims any obligation to revise or update any such forward-looking information or to publicly announce the result of any revisions to any of the forward-looking information contained herein to reflect future results, events or developments, except as required by law.
