CSE: CTTT | OTCQB: CITLF | FRA: X9V

CRITICAL INFRASTRUCTURE TECHNOLOGIES LTD. AND BABCOCK INTERNATIONAL GROUP EXECUTE AN INCREASED SCOPE MEMORANDUM OF UNDERSTANDING (MOU)

Vancouver, BC – December 18, 2025 – Critical Infrastructure Technologies Ltd. (CSE: CTTT) (FRA: X9V) (“CiTech” or the “Company”), a leading developer of autonomous, high-capacity mobile communications platforms, is pleased to announce it has entered into an increased scope Memorandum of Understanding (MOU) with Babcock International Group (“Babcock”) to co-develop and build a rapidly deployable platform integrating 5G communications, Intelligence, Surveillance and Reconnaissance (ISR), and counter-Unmanned Aerial Systems (UAS) capabilities for not only the Ukrainian Armed Forces, but now also for all of Europe and Southeast Asia.

The original MOU agreement, signed at the DSEI (Defence and Security Equipment International) expo in London in September 2025, was put in place in order for both companies to work exclusively on the Ukrainian Ministry of Defence request to supply 50 of CiTech’s Nexus 20 platforms.

The increase scope MOU, expands the regions of collaboration to now include all of Europe together with Southeast Asia, given the significant opportunities that exist for the Nexus 20 platform across these regions.

“It is fantastic to expand the scope of collaboration with Babcock and to now work together to promote the Nexus 20 into the new regions added,” said Brenton Scott, CEO of CiTech. “With our first Nexus 20 due to arrive in the EU in April 2026 for whole of region demonstrations, we are looking forward to 2026 with confidence.”

On Behalf of the Board of Directors:

Brenton Scott
Director & Chief Executive Officer

About Babcock International Group

Babcock is a FTSE 100 international defence company, operating in the UK, Australasia, Canada, France and South Africa with exports to additional markets. We deliver complex support and product solutions to enhance our customers' defence capabilities and critical assets. We are driven by our purpose: to create a safe and secure world, together.

About Critical Infrastructure Technologies Ltd.

Listed on the CSE with operations in Perth, Western Australia, CiTech is creating autonomous, high capacity, rapidly deployable technology that delivers essential services to where they are needed most. CiTech is targeting the mining, defence, border security/surveillance and emergency services sectors in relation to its first product release, the Nexus 16, which aims to provide critical mobile telecommunications for such sectors. Using patented technologies, CiTech's self-deploying platform (SDP) provides a solution for two of the greatest limitations of current rapidly deployable communication solutions, strength of the tower and ability to rapidly self-deploy and operate, in numerous situations. The SDP is designed to support radio equipment including LTE (Long Term Evolution) and several other technological payloads, such as surveillance and anti-drone systems. CiTech has completed the research and development phase and is currently commercialising the first of many products that will be released. To learn more about the Company, visit www.citech.com.au.
