CSE: CTTT | OTCQB: CITLF | FRA: X9V

CRITICAL INFRASTRUCTURE TECHNOLOGIES EXECUTES A 3-WAY CONFIDENTIALITY AGREEMENT WITH BABCOCK INTERNATIONAL AND DRAGANFLY INC AND MAKES A FURTHER ADVANCE TO PLUTUS INVEST AND CONSULTING GmbH.

Vancouver, BC – December 8, 2025 – Critical Infrastructure Technologies Ltd. (CSE: CTTT) (OTC: CITLF) (FRA: X9V) (“CiTech” or the “Company”), a leading developer of autonomous, high-capacity mobile communications and security platforms, is pleased to announce the signing of a Mutual Non-Disclosure Agreement (NDA) with Babcock International Group PLC (LSE: BAB) (“Babcock”), and Draganfly Inc. (NASDAQ: DPRO) (“Draganfly”) to progress a strategic, multi-company collaboration aimed at strengthening defence and security capabilities across the Asia-Pacific region.

The collaboration brings together complementary strengths across defence engineering, advanced technology integration, unmanned systems, and mission-critical operational delivery, enabling sophisticated, scalable solutions for governments, military forces, and national-security stakeholders throughout the region.

Leveraging the Strengths of Three Proven Organisations

Babcock International Group

Babcock is one of the United Kingdom’s leading defence primes, delivering mission-critical engineering, naval support, fleet management, training, base operations, and major defence programs. Its longstanding support to the UK Ministry of Defence and allied nations provides a trusted pathway into rapidly developing Asia-Pacific defence markets.

Critical Infrastructure Technologies Ltd.

CiTech provides advanced engineering capabilities, mission-system integration, and technology-driven solutions for defence, national security, critical infrastructure, and energy. CiTech specialises in digital architectures, sensor ecosystems, data platforms, decision-support

systems, and resilient mission environments, forming the technological backbone of the partnership.

Draganfly Inc.

Draganfly is an award-winning developer of unmanned aerial systems (UAS) and sensor-driven data solutions. Its recent military sale of Commander 3XL unmanned systems into the Asia-Pacific region validates the operational maturity of its platforms and reinforces its role in frontline mission support. Draganfly's NDAA-compliant and NATO-supportive systems support military, public-safety, and disaster-response operations.

Strengthening Regional Defence Modernisation

Together, the three companies form a comprehensive capability stack spanning:

- Mission-critical defence engineering, sustainment, and fleet support (Babcock)
- High-assurance digital integration, sensor networks, and resilient mission systems (CiTech)
- Advanced UAS, ISR technologies, and operational platforms (Draganfly)

This unified capability supports end-to-end solutions across:

- National defence modernisation
- Border and maritime security
- Disaster and humanitarian response
- Multi-domain situational awareness
- Critical infrastructure protection
- Training, sustainment, and operational lifecycle services

Positioned for Asia-Pacific Defence Priorities

As Asia-Pacific governments prioritise security resilience, sovereign capability, and rapid-response technologies, the combined strengths of Babcock, CiTech, and Draganfly position the group to meet regional requirements with integrated, technologically advanced, and operationally proven solutions.

The parties will now begin evaluating targeted opportunities and joint-program concepts tailored to defence and security needs across the region.

Additional Advance to Plutus Invest and Consulting GmbH

Further to the company's news released dated July 22, 2025, the company has advanced an additional €50,000 to Plutus Invest and Consulting GmbH on account of the marketing and communications services provided by Plutus pursuant to the consulting agreement dated July 16, 2025.

About Babcock International Group

Babcock is a FTSE 100 international defence company, operating in the UK, Australasia, Canada, France and South Africa with exports to additional markets. We deliver complex support and product solutions to enhance our customers' defence capabilities and critical assets. We are driven by our purpose: to create a safe and secure world, together.

About Draganfly Inc. (NASDAQ: DPRO)

Draganfly is a pioneering developer of unmanned aerial vehicles, sensors, and AI-driven data solutions. Since 1998, the company has delivered NATO-supportive and NDAA-compliant platforms including the Commander 3XL, Heavy Lift, and Outrider systems, supporting military, public safety, industrial, environmental, and humanitarian operations worldwide.

About Critical Infrastructure Technologies Ltd.

Listed on the CSE with operations in Perth, Western Australia, CiTech is creating autonomous, high capacity, rapidly deployable technology that delivers essential services to where they are needed most. CiTech is targeting the mining, defence, border security/surveillance and emergency services sectors in relation to its first product release, the Nexus 16, which aims to provide critical mobile

telecommunications for such sectors. Using patented technologies, CiTech's self-deploying platform (SDP) provides a solution for two of the greatest limitations of current rapidly deployable communication solutions, strength of the tower and ability to rapidly self-deploy and operate, in numerous situations. The SDP is designed to support radio equipment including LTE (Long Term Evolution) and several other technological payloads, such as surveillance and anti-drone systems. CiTech has completed the research and development phase and is currently commercialising the first of many products that will be released. To learn more about the Company, visit www.citech.com.au.

Neither the CSE nor its Regulation Services Provider (as that term is defined in the policies of the CSE) accepts responsibility for the adequacy or accuracy of this release.

FORWARD-LOOKING INFORMATION

*This news release contains "forward-looking information" and "forward-looking statements" (collectively, "**forward-looking information**") within the meaning of applicable securities laws. Forward-looking information is generally identifiable by use of the words "believes," "may," "plans," "will," "anticipates," "intends," "could," "estimates," "expects", "forecasts", "projects" and similar expressions, and the negative of such expressions. Forward-looking information in this news release.*

Forward-looking information is subject to known and unknown risks, uncertainties and other factors that may cause the Company's actual results, level of activity, performance or achievements to be materially different from those expressed or implied by such forward-looking information. Forward-looking information is based on the reasonable assumptions, estimates, analysis and opinions of management made in light of its experience and perception of trends, current conditions and expected developments, and other factors that management believes are relevant and reasonable in the circumstances at the date such statements are made. Although the Company has attempted to identify important factors that could cause actual results to differ materially from those contained in forward-looking information, there may be other factors that cause results not to be as anticipated. There can be no assurance that such information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. All forward-looking information herein is qualified in its entirety by this cautionary statement, and the Company disclaims any obligation to revise or update any such forward-looking information or to publicly announce the result of any revisions to any of the forward-looking information contained herein to reflect future results, events or developments, except as required by law.
