

## NEWS RELEASE

CSE: CTTT | OTCQB: CITLF | FRA: X9V

### **CRITICAL INFRASTRUCTURE TECHNOLOGIES EXECUTES A CONFIDENTIALITY AGREEMENT WITH HUI HULIAU TO ADVANCE COLLABORATION IN U.S. DEFENCE AND GOVERNMENT MARKETS**

**Vancouver, BC – November 18, 2025** – Critical Infrastructure Technologies Ltd. (CSE: CTTT) (OTC: CITLF) (FRA: X9V) (“CiTech” or the “Company”), a leading developer of autonomous, high-capacity mobile communications and security platforms, is pleased to announce the execution of a Non-Disclosure Agreement (NDA) with Hui Huliau, a U.S. based non-profit Native Hawaiian Organization (NHO) that owns multiple SBA 8(a) certified companies providing mission-critical services to U.S. federal agencies.

The NDA establishes a framework for the secure exchange of proprietary, technical, and commercial information between CiTech and Hui Huliau. This supports detailed collaboration discussions across defence, homeland security, emergency management, aviation, logistics, and critical infrastructure sectors within the United States and allied markets.

Hui Huliau’s subsidiaries deliver capabilities including federal contracting, logistics, cyber security, aviation services, training, and technology integration. Their position as an NHO-owned group with SBA 8(a) certifications provides uniquely structured procurement pathways that can accelerate deployment of advanced technologies into U.S. government programs.

“Signing this NDA with Hui Huliau is a key milestone in expanding CiTech’s presence in the United States,” said Brenton Scott, CEO, CiTech. “Their recognised expertise supporting U.S. federal agencies, combined with their unique contracting advantages as a Native Hawaiian Organization, makes them a highly strategic partner for our Nexus platform and other CiTech capabilities.”

The agreement supports CiTech’s strategy of forming strong partnerships with organisations that have established authority, reach, and procurement access across major global defence and government markets. Together, the two organisations will assess opportunities for integrating CiTech’s deployable Nexus platform into U.S. federal, homeland-security, emergency-response, and critical-infrastructure environments.

**About Critical Infrastructure Technologies Ltd.**

Listed on the CSE with operations in Perth, Western Australia, CiTech is creating autonomous, high capacity, rapidly deployable technology that delivers essential services to where they are needed most. CiTech is targeting the mining, defence, border security/surveillance and emergency services sectors in relation to its first product release, the Nexus 16, which aims to provide critical mobile telecommunications for such sectors. Using patented technologies, CiTech's self-deploying platform (SDP) provides a solution for two of the greatest limitations of current rapidly deployable communication solutions, strength of the tower and ability to rapidly self-deploy and operate, in numerous situations. The SDP is designed to support radio equipment including LTE (Long Term Evolution) and several other technological payloads, such as surveillance and anti-drone systems. CiTech has completed the research and development phase and is currently commercialising the first of many products that will be released.
